

If the captain is overboard

Immediately stops the engine(s)

Sounds an audible alarm from the hub and mobile device

Marks the location via GPS

Sends alerts to the hub, the app, and the wearables connected to the passengers onboard

Sends instructions to passengers on how to return to the location where the captain went overboard*

** If passenger has 1st Mate app downloaded on their mobile device*

If the passenger is overboard

Alerts the captain and all other passengers wearing a fob

Sounds an audible alarm from the hub and mobile device

Marks the location via GPS

Provides continuously updated directions to the location where the passenger went overboard

THEFT DETERRENT SYSTEM (TDS)

TDS can lock your engine(s) to prevent unauthorized use.

With 1st Mate, you can unlock the vessel via proximity of the captain's wearable and/or the "unlock function" of the app (via PIN, fingerprint, face recognition, etc.).

ADDITIONAL FEATURES

Disable in Neutral

A setting that users can configure that turns off alerts if engine(s) is in neutral.

Over the Air Updates

1st Mate is capable of updating (to fix bugs or add new features) Hub software and the wearables via the mobile device.

Mobile Device App Interface

App is the primary interface to set up/configure and view status of the system.

CONFIDENCE ON THE WATER

Quicksilver has been the top choice of the most demanding boaters for more than 70 years. Developed to OEM standards and tested in the toughest marine conditions, Quicksilver products deliver performance, protection and peace of mind when pushed to the limit.

WIRELESS CONFIDENCE & SAFETY

1st Mate combines confidence and safety into an easy-to-use package that enhances your enjoyment of the water with wireless convenience.

EMERGENCY CUTOFF FUNCTION

1st Mate provides boaters with a wireless alternative to a corded engine cutoff switch that's easy to use and compliant with boating regulations.

DISTRESS MESSAGING

Distress messages can be configured to send an alert with location, heading, date and time to designated emergency contacts if the captain falls overboard.

THEFT PROTECTION

Theft Deterrent System provides the option to lock the engine(s) to prevent unauthorized use when captain and crew are away from the boat.

OVERBOARD ALERTS

Wearable fobs and the mobile app alert captain and passengers with date, time and GPS coordinates if a person or pet falls overboard.

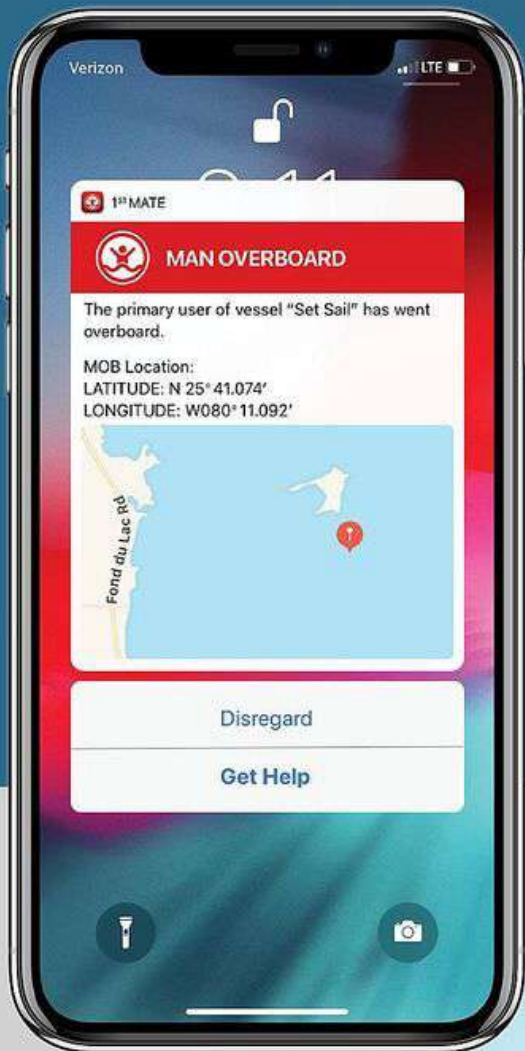

DISTRESS MESSAGE

If a captain (driver wearing the captain's fob) falls overboard and can't get back onboard, or passengers can't return the boat to the captain:

Sends a distress message to the contacts in the app's 'in Case of Emergency' section when that feature was enabled and a person either initiates the request or the countdown timer (set by the user) has completed

Includes location, heading, date, and time of the 'man overboard' event in the distress message

MOB Location

MOB Coordinates
43°48' 49.5" N
88°27' 54.2" W

Distance to MOB
65 ft

Added Safety and Confidence

1st Mate adds another layer of boating safety by notifying a boat's captain or its passengers if someone has fallen overboard. 1st Mate also serves as an effective deterrent to boat-and-engine theft.

WHAT IS 1st MATE?

Industry's first engine-integrated intelligent hub and wearable device that integrates with marine propulsion systems to provide safety alerts and information including:

Man overboard monitoring for captain and up to 7 passengers

Distress Message capability

Theft Deterrent functionality
